

Invited Talk at NTNU Trondheim

An Introduction to NorNet for the Site Deployment at NTNU Trondheim

Thomas Dreibholz, dreibh@simula.no

Simula Research Laboratory A/S

12 April 2013

- Research and Users
- Conclusion

Motivation: Robust Networks

- More and more applications rely on ubiquitous Internet access!
- However, our current networks are not as robust as they should be ...

How to make networks more robust?

Resilience by Redundancy

Multi-Homing

- Connections to multiple Internet Service Providers (ISP)
- Idea: if one ISP has problems, another connection still works

Do multiple ISP connections really improve robustness?

Idea: A Testbed for Multi-Homed Systems

Research in realistic setups is necessary!

- A multi-homed Internet testbed would be useful
 - Something like PlanetLab?
 - Perhaps with better node availability?
 - Support for mobile access (e.g. 3G) as well as wired?
- **NorNet** – A research testbed for multi-homed systems!
 - Lead by the Simula Research Laboratory in Fornebu, Norway
 - Supported by Forskningsrådet

NORNET

Overview: The NorNet Project

- Motivation
- The NorNet Project
 - NorNet Core
 - NorNet Edge
- Research and Users
- Conclusion

Goals of the NorNet Project

- Building up a **realistic** multi-homing testbed
- Wired and wireless
 - Wired → “NorNet Core”
 - Wireless → “NorNet Edge”
- **Perform research with the testbed!**

How to get a realistic testbed?

Idea: Distribution of NorNet over whole Norway

- **Challenging topology:**
 - Large distances
 - A few “big” cities, many large rural areas
 - Svalbard:
 - Interesting location
 - Many polar research institutions
- **NorNet Core:**
 - Ca. 10 sites planned
- **NorNet Edge:**
 - Ca. 500 nodes planned

Overview: NorNet Core

- Motivation
- The NorNet Project
 - NorNet Core
 - NorNet Edge
- Research and Users
- Conclusion

Idea: Tunnelling

- Researchers require control over used ISP interfaces
 - Which outgoing (local site) interface
 - Which incoming (remote site) interface

- Idea: Tunnels among sites

- Router at site A: IPs A_1, A_2, A_3

- Router at site B: IPs B_1, B_2

- IP tunnel for each combination:

$A_1 \leftrightarrow B_1, A_1 \leftrightarrow B_2, A_2 \leftrightarrow B_1, A_2 \leftrightarrow B_2, A_3 \leftrightarrow B_1, A_3 \leftrightarrow B_2$

- Fully-connected tunnel mesh among NorNet Core sites (ca. 10)

- Each site's router (called **tunnelbox**) maintains the tunnels

- Static tunnels

- NorNet-internal addressing and routing over tunnels

Address Assignment

- NorNet-internal address spaces:
 - Private NorNet-internal IPv4 “/8” address space (NAT to outside)
 - Public NorNet-internal IPv6 “/48” address space
- Systematic address assignment:
 - IPv4: 10.<Provider ID>.<Site ID>.<Node ID>/24 per site
 - IPv6: 2001:700:4100:<PP><SS>::/64 (*PP*=Provider ID; *SS*=Site ID)

Make it as easy as possible to keep the overview!

Idea: PlanetLab-based Software for Experiments

- Key idea:
 - Researchers should get virtual machines for their experiments
 - Like **PlanetLab** ...
 - ... but with multi-homing, of course
- PlanetLab software:
 - Different “stable” distributions: PlanetLab, OneLab, etc.
 - Current implementation: based on Linux VServers
 - Not in mainline kernel
 - Patched kernel, makes upgrades difficult
 - The future: **Linux Containers (LXC)**
 - Active development by PlanetLab/OneLab
 - We are involved in testing experimental LXC software

NorNet Core Site Deployment

A NorNet Core site:

- 1x switch
- 4x server
 - 1x tunnelbox
 - 3x research systems
- At least two ISP connections
 - Uninett 
 - Other providers

Status:

- 9+1 sites deployed
- 1 more on Friday

Longyearbyen 78.2°N,15.6°E

NorNet Core på Svalbard

Monitoring

- PlanetLab:
 - 367 nodes of 1035 nodes alive (June 28, 2012)
⇒ availability < 36% ☹
 - NorNet should do much better!
- Direct contact to technical staff/researchers at sites
- Monitoring using Nagios
 - Flexible
 - Extendable by service-specific plug-ins

The Nagios logo is displayed in a bold, black, sans-serif font. The letter 'N' is significantly larger than the other letters and has a horizontal line extending from its base to the left. A registered trademark symbol (®) is located at the top right of the 's'. The logo is positioned on the right side of the slide, partially overlapping a decorative background of white, wavy, grid-like lines.

How to visualise NorNet?

“Kontrollsentret”

Velkommen til NorNet-Kontrollsentret på Simula Research Laboratory, Fornebu

Overlays

- Sites
- Connections
- Clouds forecasts
- Precipitation forecasts
- Weather

Base Layer

- Bing Aerial
- Bing Road
- Google Terrain
- Google Satellite
- Mapnik

Overview: NorNet Edge

- Motivation
- The NorNet Project
 - NorNet Core
 - NorNet Edge
- Research and Users
- Conclusion

The NorNet Edge Box: Ready for Deployment

Box contents:

- Beagle Bone embedded Linux system
- 4x USB UMTS (at USB hub):
 - Telenor, NetCom,
 - Network Norway, Tele2
- 1x ICE CDMA mobile broadband
- 1x Ethernet
- Power supplies
- Handbook

Status:

- Ca. 300 nodes distributed already
- Initial measurements

Overview: Research

- Motivation
- The NorNet Project
 - NorNet Core
 - NorNet Edge
- Research and Users
- Conclusion

Resilience

- Network resilience
 - Are there hidden dependencies among ISPs?
 - Are there dependencies between mobile and wired ISPs?
 - ...
- Mobility and handovers
- Applications
 - Emergency call handling (e.g. healthcare)
 - ...
- Security

Load Sharing

- Multi-Path Transfer
 - Network Layer
 - Routing ...
 - Transport Layer
 - Concurrent Multipath Transfer for SCTP (CMT-SCTP)
 - Multi-Path TCP (MPTCP)
 - ...
 - Higher Layers
- Applications
 - Multimedia (e.g. IPTV, Video on Demand), ...
 - Web Real-Time Communication (WebRTC)
 - ...

Users

“The road to hell is paved with unused testbeds.”

[James P. G. Sterbenz]

- Of course, NorNet does **not** intend to be another unused testbed!
- NorNet will be open for all interested users!
 - Similar to PlanetLab ...
 - ... but with higher node availability and tighter monitoring
 - ... and, of course, multi-homing
- **Particularly, it can also be used at NTNU Trondheim!**

More details to be announced soon!

Overview: Conclusion

- Motivation
- The NorNet Project
 - NorNet Core
 - NorNet Edge
- Research and Users
- Conclusion

Conclusion and Future Work

- NorNet is progressing!
 - Management software under development
 - First site deployments have been made
- Future work:
 - Finish the initial deployment
 - Make sites multi-homed
 - Improve/refine management software

And, of course, do some research!

Any Questions?

N  R N E T
